LIST OF CONTENTS

VOLUME 18 (1991)

Number 1

Fatiha Radja, Anne-Marie Laporte, Geneviève Daval, Daniel Vergé, Henri Gozlan and Michel Hamon	1	Invited Review: Autoradiography of serotonin receptor subtypes in the central nervous system
José M. Palacios, Christian Waeber, Guadalupe Mengod and Daniel Hoyer	17	Critique: Autoradiography of 5-HT receptors: a critical appraisal
Xuan Liu and Kent E. Vrana	27	Commentary: Leucine zippers and coiled-coils in the aromatic amino acid hydroxylases
William A. Wolf and Donald M. Kuhn	33	Commentary: Cocaine and serotonin neurochemistry
Miguelina Levi de Stein, José S. Aguilar, María I. Fonseca and E. De Robertis	39	*S*-adenosyl methionine increases α_1 adrenoceptors in rat cerebral cortex membranes
Vladimir J. Balcar	43	Effects of variations in ionic concentrations on high affinity uptake of L-glutamate in non-glutamatergic neurons and non-neuronal cells cultured from neonatal rat cortex
Claudia Martini, Rossella Pacini and Antonio Lucacchini	51	Inactivation of [^{35}S]t-butylbicyclophosphorothionate binding sites by the arginine reagent, 2,3-butanedione
Kiyokazu Ogita, Tomoko Kouda, Takeo Suzuki, Atsuko Ohkawara, Riyo Enomoto, Toshitaka Nabeshima and Yukio Yoneda	55	Differential effects of SH-reactive agents on [^{3}H]($\pm$)-3-(2-carboxypiperazin-4-yl)propyl-1-phosphonate and [^{3}H]glutamate binding in brain synaptic membranes treated with Triton X-100
Robin D. Allan, Helena W. Dickenson, Rujee K. Duke and Graham A. R. Johnston	63	ZAPA, a substrate for the neuronal high affinity GABA uptake system in rat brain slices
D. J. M. Reynolds, R. A. Leslie, D. G. Grahame-Smith and J. M. Harvey	69	Autoradiographic localization of 5-HT$_3$ receptor ligand binding in the cat brainstem
R. C. Morgan, L. D. Mercer, M. Cincotta and P. M. Beart	75	Binding of [^{3}H]AMPA to non-chaotrope, non-detergent treated rat synaptic membranes: characteristics and lack of effect of barbiturates
S. E. Poduslo and K. Miller	85	Ketone bodies as precursors for lipid synthesis in neurons, astrocytes, and oligodendroglia (myelin) in hyperthyroidism, hyperketonemia and hypoketonemia
N. A. Sharif and R. L. Whiting	89	Identification of B$_2$-bradykinin receptors in guinea pig brain regions, spinal cord and peripheral tissues
Anne-Marie Tassin, René-Marc Mège, Danièle Goudou, Gerald M. Edelman and François Rieger	97	Modulation of expression and cell surface distribution of N-CAM during myogenesis *in vitro*
Subhendu Goswami, Ishwar S. Singh and Jagat J. Ghosh	107	Effect of pre- and post-treatments with diazepam on the rat brain GABAergic system during anoxic stress and recovery
H. W. Scheer, L. P. Rosenthal and B. Collier	115	Effects of α-latrotoxin, lanthanides and elevated potassium concentration on acetylcholine release and free intracellular calcium levels in rat cerebral cortex synaptosomes

Jan Albrecht and Michael D. Norenberg — 125 Aluminum chloride stimulates NaCl-dependent release of taurine and γ-aminobutyric acid in rat cortical astrocytes

J. C. Louis, P. Basset, M. O. Revel, G. Vincendon and J. Zwiller — 131 Opposite effects of arachidonic acid and of its hydroperoxides on brain soluble guanylate cyclase activity

Hilde de Vos, Jean-Paul de Backer and Georges Vauquelin — 137 Efaroxan (RX 821037) is a potent and selective α_2-adrenoceptor antagonist in human frontal cortex membranes

141 Book Reviews

145 News Items

147 Corrigendum

Number 2

Steven Guard and Stephen P. Watson — 149 Invited Review: Tachykinin receptor types: classification and membrane signalling mechanisms

Stephen H. Buck, Paul L. M. van Giersbergen and Elizabeth Burcher — 167 Critique: Tachykinins and their receptors: pharmacology, biochemistry and molecular biology advance a neuropeptide story to the forefront of science

M. Castillo, J. Iglesias, M. F. Zafra and E. Garcia-Peregrin — 171 Inhibition of chick brain cholesterogenic enzymes by phenyl and phenolic derivatives of phenylalanine

M. Sieklucka, C. Heim, K. H. Sontag and N. N. Osborne — 175 Transient occlusion of rat carotid arteries increases formation of inositol phosphate. Evidence for a specific effect on α_1-receptors

Bradford O. Fanger and Arlene C. Wade — 185 Somatostatin competes with the central portion of gastrin releasing peptide for binding to a 120 kDa protein

Clark D. Carrington, Daniel M. Lapadula, Linda Dulak, Marvin Friedman and Mohamed B. Abou-Donia — 191 *In vivo* binding of [^{14}C]acrylamide to proteins in the mouse nervous system

R. Vieira, F. Martin and M. Aldegunde — 199 5-Hydroxytryptamine metabolism in the damselfly, *Ischnura graellsii*, in relation to sex and larval–adult period

X.-D. Ji, G. L. Stiles and K. A. Jacobson — 207 [^{3}H]XAC (xanthine amine congener) is a radioligand for A_2-adenosine receptors in rabbit striatum

Robert P. J. M. Smits and Arie H. Mulder — 215 Inhibitory effects of histamine on the release of serotonin and noradrenaline from rat brain slices

Jean-Pierre Gautron, Eliane Pattou, Karl Bauer and Claude Kordon — 221 (Hydroxyproline^9) luteinizing hormone-releasing hormone: a novel peptide in mammalian and frog hypothalamus

J. Rodriguez, A. Toledo, R. Rodriguez, J. Sabria and I. Blanco — 237 Histamine increases ornithine decarboxylase activity in different neonatal rat brain subcellular fractions

Robin A. Barraco, Gary A. Walter, Petra M. Polasek and John W. Phillis — 243 Purine concentrations in the cerebrospinal fluid of unanesthetized rats during and after hypoxia

A. Tenenhouse, M. Warner and J. W. Commissiong — 249 Neurotransmitters in the CNS of the vitamin D deficient, hypocalcemic rat

Jin-ichi Ito, Taiji Kato, Yoshiro Kamio, Hiroshi Kato, Teruaki Kishikawa, Takashi Toda, Shingi Sasaki and Ryo Tanaka — 257 A cellular uptake of *cis*-platinum-encapsulating liposome through endocytosis by human neuroblastoma cell

Paul Fosbraey, Janet R. Wetherell and Mary C. French — 265 Effect of acute physostigmine–hyoscine pretreatment on the neurochemical changes produced by soman in the guinea-pig

D. Bladier, J. P. Le Caer, R. Joubert, M. Caron and J. Rossier — 275 β-Galactoside soluble lectin from human brain: complete amino acid sequence

Kazuhiko Teraoka, Kyoji Morita, Motoo Oka and Shuichi Hamano — 283 Influence of cytoplasmic ATP reduction on catecholamine synthesis in cultured bovine adrenal chromaffin cells

Richard Barry, Mark Payton and Nigel Groome — 291 Characterization of myelin basic protein catabolism products in the cerebrospinal fluid from multiple sclerosis, stroke and head injury patients

301 News Items

Number 3

N. C. Schaad, P. J. Magistretti and M. Schorderet — 303 Invited Review: Prostanoids and their role in cell–cell interactions in the central nervous system

Michael Markefski and Gerald Wolf — 323 Influence of ammonia, octanoate, quinolinate and hypoxic conditions on NAD(P)H fluorescence of hippocampal slices

Shin-ichi Imai, Yoshihisa Kitamura and Yasuyuki Nomura — 331 Different effects of *N*-ethylmaleimide on the binding characteristics of 5-hydroxytryptamine receptor subtypes in rat brain membranes

M.-I. Sepúlveda and D. B. Sattelle — 341 Pharmacologically separable [^{3}H]glutamate binding sites on insect muscle membranes

Michele Zoli, Saverio Bettuzzi, Francesco Ferraguti, Maria Cristina Ingletti, Isabella Zini, Kjell Fuxe, Luigi F. Agnati and Arnaldo Corti — 347 Regional increases in ornithine decarboxylase mRNA levels in the rat brain after partial mesodiencephalic hemitransection as revealed by *in situ* hybridization histochemistry

P. T.-H. Wong and W. L. Teo — 353 Localization of the specific binding sites of [^{3}H]tryptophan in rat brain

K. Nakajima, M. Imazawa and K. Miyamoto — 357 Presence of another species of myelin basic protein (MBP) in the developing chick brain

L. Tapia-Arancibia and T. Humbert — 367 Activation of dihydropyridine-sensitive calcium channels induces somatostatin release from hypothalamic neurons. Pharmacological characterization

John G. R. Jefferys, Philip Mitchell, Lawrence O'Hara, Christopher Tiley, John Hardy, Sarah J. Jordan, Marina Lynch and Jane Wadsworth — 373 *Ex vivo* release of GABA from tetanus toxin-induced chronic epileptic foci decreased during the active seizure phase

H. L. White and P. W. Scates — 381 Effects of GTPγS and other nucleotides on phosphoinositide metabolism in crude rat brain synaptosomal preparations

Richard F. Cowburn, Anita Garlind, Cora O'Neill, Irina Alafuzoff, Bengt Winblad and Christopher J. Fowler — 389 Characterization and regional distribution of adenylyl cyclase activity from human brain

Lars Nilsson, Bengt Winblad, Inga Volkmann, Irina Alafuzoff and Lena Bergström — 399 Characterization and quantification of ^{125}I-Bolton Hunter substance P binding sites in human brain

Ewa Malatynska, Steven C. Dilsaver, Richard J. Knapp, Monique L. Giroux, Masaaki Ikeda and Henry I. Yamamura — 405 The interaction of a benzodiazepine receptor antagonist (Ro15–1788) with GABA and GABA receptor antagonists at the $GABA_A$ receptor chloride–ionophore complex

Darryle D. Schoepp and Bryan G. Johnson — 411 *In vivo* 2-amino-3-phosphonopropionic acid administration to neonatal rats selectively inhibits metabotropic excitatory amino acid receptors *ex vivo* in brain slices

Yukio Okano, Haruhiro Higashida, Fu Tao, Takayuki Sakai and Yoshinori Nozawa — 419 Bradykinin-induced phosphoinositide-dependent responses in protein kinase C down-regulated NCB-20 cells

Judith Melki, Brigitte Blondet, Martine Pinçon-Raymond, Patrick Dreyfus and François Rieger — 425 Generalized molecular defects of the neuromuscular junction in skeletal muscle of the wobbler mutant mouse

435 Book Reviews

437 News Items

Number 4

IUPHAR SATELLITE SYMPOSIUM ON CHEMISTRY AND BIOLOGY OF ENDOTHELIN

M. R. Dashwood, R. M. Sykes, M. J. Collins, S. Prehar, S. Theodoropoulos and M. H. Yacoub — 439 Identification of [^{125}I]endothelin binding sites in human coronary tissue

Stephen A. Douglas and C. Robin Hiley — 445 Responses to endothelin-1, human proendothelin (1-38) and porcine proendothelin(1-39) in the rat on intravenous administration and in the blood perfused mesentery

Bernard Bucher, Dominique Paya and Jean-Claude Stoclet — 455 Modulation of [^{3}H]noradrenaline release by endothelin-1 in the rat tail artery

Julianne J. Reid and An T. Lieu — 461 The effect of 4-week streptozotocin-induced diabetes on responses to endothelin-1 in rat isolated atria

M. La, H. K. Wong-Dusting and M. J. Rand — 465 Endothelin-1 enhances responses to sympathetic nerve stimulation in endothelium-denuded and endothelium-intact rabbit ear arteries

André Aumelas, Laurent Chiche, Eve Mahé, Dung Le-Nguyen, Philippe Sizun, Patrick Berthault and Bruno Perly — 471 ^{1}H NMR study of the solution structure of sarafotoxin-S6b

Elisabeth Boichot, Françoise Pons, Vincent Lagente, Caroline Touvay, Jean-Michel Mencia-Huerta and Pierre Braquet	477	Phosphoramidon potentiates the endothelin-1-induced bronchopulmonary response in guinea-pigs
Françoise Pons, Caroline Touvay, Vincent Lagente, Jean-Michel Mencia-Huerta and Pierre Braquet	481	Bronchopulmonary and pressor effects of big-endothelin-1 in the guinea-pig
John T. Pelton	485	Fluorescence studies of endothelin-1
Patrick Bortmann, Jan Hoflack, John T. Pelton and Vladimir Saudek	491	Solution conformation of endothelin-3 by ^{1}H NMR and distance geometry calculations
H. C. Cheng and R. C. Dage	497	Effects of inhibitors of protein kinase C and phosphodiesterase on the contractile effects of endothelin in dog femoral artery
Yasufumi Kataoka, Shuichi Koizumi, Showa Ueki and Masami Niwa	503	Is an endothelin a neurotoxic factor in the brain?
C. Richard Jones, Kimihiro Yamashita, Marie E. Stoeckel and Mary H. Richards	507	Endothelin-1 binding sites and inositol-monophosphate formation in kidney medulla from adult and juvenile SHR and WKY rats
J. Pernow, A. Hemsén, A. Hallén and J. M. Lundberg	515	Vascular effects, formation, clearance and release of endothelin peptides in the pig
Tomoyuki Kuwaki, Naohiro Koshiya, Naohito Terui and Mamoru Kumada	519	Endothelin-1 modulates cardiorespiratory control by the central nervous system
Yuji Kobayashi, Akihiro Sato, Hiroyuki Takashima, Haruhiko Tamaoki, Shigenori Nishimura, Yoshimasa Kyogoku, Kazuhiro Ikenaka, Tetsuo Kondo, Katsuhiko Mikoshiba, Hironobu Hojo, Saburo Aimoto and Luis Moroder	525	A new α-helical motif in membrane active peptides
Koji Nishikori, Hirokazu Akiyama, Yoshimasa Inagaki, Hideo Ohta, Tomoko Kashiwabara, Akihiro Iwamatsu, Motoyoshi Nomizu and Akihito Morita	535	Receptor binding affinity and biological activity of C-terminal elongated forms of endothelin-1
Arco Y. Jeng, Paula Savage and Shiling Hu	541	A comparison of the binding of endothelin to various tissues from spontaneously hypertensive and Wistar–Kyoto rats
Robert K. Minkes and Philip J. Kadowitz	547	Differential effects of endothelin peptides in the systemic and pulmonary vascular beds of the cat
Eric Martel, Pascal Champeroux, Anne-Marie Brisac, Annick Magnier, Serge Richard and Michel Safar	553	Pressor responses to endothelin-1 in normotensive and spontaneously hypertensive rats
Ekong Eta and Chris R. Triggle	559	A comparative study of endothelin and sarafotoxin action in vascular and non-vascular smooth muscle
Sandro Giuliani, Alessandro Lecci, Carlo Alberto Maggi, Paolo Rovero and Antonio Giachetti	565	Effect of intrathecal administration of ET-1, ET-3 and ET(16–21) on blood pressure and micturition reflex in anesthetized rats
Lars Olaf Cardell, Rolf Uddman and Lars Edvinsson	571	Two functional endothelin receptors in guinea-pig pulmonary arteries

Anthony Johns, K. Rewers-Felkins, P. Devesly, Gabor M. Rubanyi and Lynne H. Parker-Botelho

575 Mobilization of intracellular calcium and stimulation of calcium fluxes by endothelin-2 in cultured mouse Swiss 3T3 fibroblasts

581 News Items
